

STARTUP EVERWAVE @SALONE NAUTICO VENEZIA 2021:

- 29.5. – 6.6.2021, find us at Pier 3
- Christening of the garbage boat with name „Moringa“: 29.5. at 4pm
- If you are interested in a meeting, please contact Inga Hilbig (hilbig@everwave.de)
- More infos about us: www.everwave.de and www.garbage-boat.com
- How our Cleanup Missions look like: https://www.youtube.com/watch?v=_Psi0IK59fc
- Press material: <https://cloud.everwave.de/s/iFCABFk963ZimLr>

HOW EVERWAVE CLEANS UP THE WORLD WITH GARBAGE BOATS

Millions of tonnes of plastic pour into our oceans every year, harming nature and humans. Every minute, a truckload of plastic waste enters the oceans - eleven million tonnes of plastic every year. The startup everwave does something about this. everwave relies on technological solutions to intercept the garbage already in the rivers and on ecological inspiration to educate society in a sustainable way.

The startup focuses on two different Cleanup Technologies: The stationary cleanup platform HiveX which will run a first pilot mission in summer 2021 and the flexible garbage boat CollectiX, which will be seen at SALONE NAUTICO VENEZIA 2021.

CollectiX has been constructed with the partners Berky, a boat specialist from Germany, and the German Research Center of Artificial intelligence, which equippes the boat with drones and AI, that gather data about plastic pollution. The garbage boat proved to be a game changer in the fight against global plastic waste in previous Cleanup Missions e.g. in Serbia or Bosnia, where it collected hundreds of plastic bottles, fridges, car tires and a lot of other things. It can pick up around 20 tons of material per day and is perfect for places, where garbage patches block the rivers natural flow.

Next to collecting garbage, everwave cares about a holistic approach. The collected waste is washed and shredded after collection and, if the situation on site allows it, returned to the recycling cycle. In the long term, our material shall be returned to production and thus waste becomes a resource! Through environmental education the startup tries to inspire people to take care for our rivers and to create a healthy future together.

The next Cleanup Missions are already in sight and the goal is to expand the garbage fleet in order to clean up as many places in the world as possible. We are happy that we have the strong supporter Moringa by Landmarken AG at our side, who is also the name giver of the presented garbage boat at the Venice Boat Show. Companies committed to a sustainable future are indispensable in the fight against plastic pollution in the world's waters.

**BE PART OF THE WAVE - LET'S TALK ABOUT HOW WE CAN ALL CREATE
A SUSTAINABLE FUTURE TOGETHER.**
